

Up to 15 meters shooting range and coverage space as much as 16 square meters.

The air-charged Shooting Net is a state-of-the-art police or security guard equipment with air as the driving power for shooting.

The successful completion of the development of this product has filled a security gap both domestically and internationally.

The similar products which are driven by gunpowder need Government approval while our product does not require it.

The most outstanding advantage of the current product is its safety and environmental friendliness as well as the low costs of operations.

In Your Home

Keep this great SHOOTING NET in your home for pure security purpose. Now you can sleep peacefully as you have a weapon that do not need a license and it can catch invaders without any fight or injury.

In Your Car

Keep it in your car for the emergency use, It can catch a robber without harming him.

Outdoor Partner.

This great item is a great companion for your outdoor activity like camping or hiking. Now you do not have to worry for the wild animals or thieves, you can catch them without any resistance.

Safe Animal Catching.

Hunters are happy with this amazing device, now you can catch any animal without harming or injuring them.

Armed police.

Very useful for armed police. they do not need to use force to catch the BAD GUYS. now it is much easier to capture the suspects without harming them, now no one can sue them for illegal harassment.

Security guards.

Now Security guards can take a breath that they have SHOOTING NET with them, Now they can catch the thieves. As security guards do not have a gun they always need to fight with stick and 95% thieves will run away as they are unable to catch the thieves with a stick only but now they can catch every thieves with this SHOOTING NET without harming them.

Riot Control Force.

It is much easier to use SHOOTING NET in a riot then guns and waster canons city metros, airports, railway or bus stations, oil refilling stations, oil fields, chemical industrial sites or some other special locations.

1. Advantages concerning governing policies: As the air-charged catching net is in the category of non-gunpowder firing products involving no gunpowder in the making, it does not belong to military weaponry. As a result, it will not be subject to the restrictions for manufacture and exports by the state policies. In the process of operation, the net will not generate any flames or any harmful gases, while demonstrating the advantages of low noise, safety and environment friendliness. It is particularly safe to use in such special locations as the city metros, airports, railway or bus stations, refueling stations, oil fields and some other chemical industrial sites.

2. Convenience in operations: This product has the outer appearance similar to that of a large electric torch. The operator can put it in the car or carry it on the shoulder, featuring convenient carriage and simple operation. Within 2 seconds, the launching can be completed. All the operator do that with the different kinds of products can choose at the target within arrange of 3-7.5 meters or 5-15 meters distance. With one hand holding the upper barrel and the other hand open the safety pin. By just pressing the launching button, an intensively powerful umbrella-shaped net will be fired with the diameter up to 2?3 meters and the coverage space as much as 16 square meters. Once the suspect is covered by the net, he will be immediately bound by the net strings or even pulled down to the ground, which results in no chance of escaping. The net can be reused and the air storage tank can be recharged.

3. Extensive applications: While the gunpowder firing devices are only to be equipped to the law enforcement staffs of the state, the air-charged catching net as a non-fire attacking product has much more extensive applications. In addition to the public security staff persons, the armed police, the judicial police, the special police, etc. who can use it in the anti-terror operations for capturing the terrorists, in dealing with some contingencies, or in the actions of keeping social security, the economic police, the security guards, the joint public security patrol guards and some other security personnel can apply this product as a useful equipment in their operations.
